SECTION 9 (1)

BY: CRULES AND REGULATIONS
FOR THE PUBLIC SERVICE COMMISSION

I. Classification of Sewer Service for Purposes of Determining Exemptions from Sales and Use Tax.

A. Residential Classification

1. Use as a dwelling unit constituting a separate independent housekeeping establishment which is separately metered for water, connected to the sewer and occupied by one or more persons as a single housekeeping unit shall be deemed residential use. The name in which an account is established or billed is a non-determining factor and the structure to which service is to be provided may be under construction, occupied or unoccupied.
2. Agricultural use when provided through the same water meter utilized by the dwelling structure on the property and connected to the sewer shall be deemed residential use.
3. Where a water meter service is installed on property that is intended for future residential use and a sewer service connection is provided whether the customer's service line is connected initially or planned to be connected in the future, shall be deemed residential use.

B. Non-residential Classification:

1. Any use other than a residential use as defined in Section A including specifically, but not by way of limitation, industrial and business usage.
2. Mobile home parks served by a single water meter and sewer connection.
3. Multiple dwelling units within one structure when all dwelling units are served by a single water meter and sewer connection.

C. Determination of Usage

The determination of usage as to whether residential or nonresidential is based upon the principal purpose for which the water service and sewer connection is provided when it was initially installed or for which the structure is being or has been constructed until the District has been notified by the owner in writing that the purpose for which the water service was installed and sewer connection has changed.

FOR THE PUBLIC SERVICE COMMISSION

RULES AND REGULATIONS

II. Usage provided from a Sewer Connection

- A. No more than one residence, including mobile homes may connect to one sewer connection.
- B. A residence and any agricultural usage (with the exception of usage by a tenant dwelling or rental dwelling) may be supplied from the same water meter and sewer connection. A tenant dwelling or rental dwelling is considered a separate residence and must be supplied from a separate water meter and separate sewer connection.
- C. Where multiple apartment buildings under separate roofs are built on the same lot, each building must have one water meter and one sewer connection and pay the appropriate connect fees for each. However, at the discretion of the property owner, each apartment within a building may have separate water meters and sewer connections.

At the discretion of the property owner, one sewer service line may service more than one building on the same lot but should the apartment complex cease to be operated as one entity, the owner of each new lot shall install a separate sewer service line from the sewer connection on the District's sewer to the point of discharge at each apartment building.

- D. Each commercial, industrial, or any other entity must have a separate water meter and sewer connection. Excluding residential and apartment complexes, where a commercial, industrial, or other entity involves more than one structure on a single lot (lot approved by the local Planning Commission), which will be operated as one entity under one entity name, such property can be served by one water meter and one sewer connection.
 - 1. Should such property cease to be operated as one entity it will be required that separate water meters and sewer connections be paid for by the owner of each lot and the service line(s) from the meter(s) and sewer connection(s) to the point of use and discharge be installed and paid for by the respective property owner(s).

SECTION 9 (1)

BY: Richard C. Neal
FOR THE PUBLIC SERVICE COMMISSION
RULES AND REGULATIONS

- E. Where multiple residential, commercial, industrial or other such units are under one roof, one water meter and service line and one sewer connection and service line are all that is required. If the property owner desires more than one meter and sewer connection, pays the appropriate contribution in aid of construction, and sewer connection fee and complies with the District's rules and regulations pertaining to application for service, additional meters and sewer connections may be provided.
- F. Mobile home parks on a single parcel of land, approved by the local Planning Commission as a mobile home park, are considered one business and may be served by one meter and one sewer connection.

III. City or County Resolution or Ordinance Requiring Connection to Sewer

Any City or County Resolution or Ordinance pertaining to the requirement that all homes, businesses and other establishments with the territory limits of the City or County who have sewer service available as defined in the City or County Resolution or Ordinance shall become water and sewer customers of the District and connect to the sewer system. Such customer shall be liable to the District for the District connection fee and monthly bill as set forth in the District's tariff as approved by the Public Service Commission.

IV. Maintenance of Customer's Sewer Service Line

All costs and expenses incident to the maintenance of the customers sewer service line shall be borne by the property owner, to include removal of any obstructions, except where it can be shown to the satisfaction of the District that the sewer service line has physically collapsed between where the customer's service line terminates and the District's sanitary sewer main. The costs and expense of repairing the collapsed sewer service line between where the customer's sewer line terminates and the District's sanitary sewer main will be borne by the District.

V. Sewer Billing Based on Gallons of Water Used Through Water Meter

All sewage discharged into the District's sewer system shall be billed on the sewer rate as approved by the Public Service Commission based on the gallons of water provided through the water meter.
